

BELLA ACCESSORIES

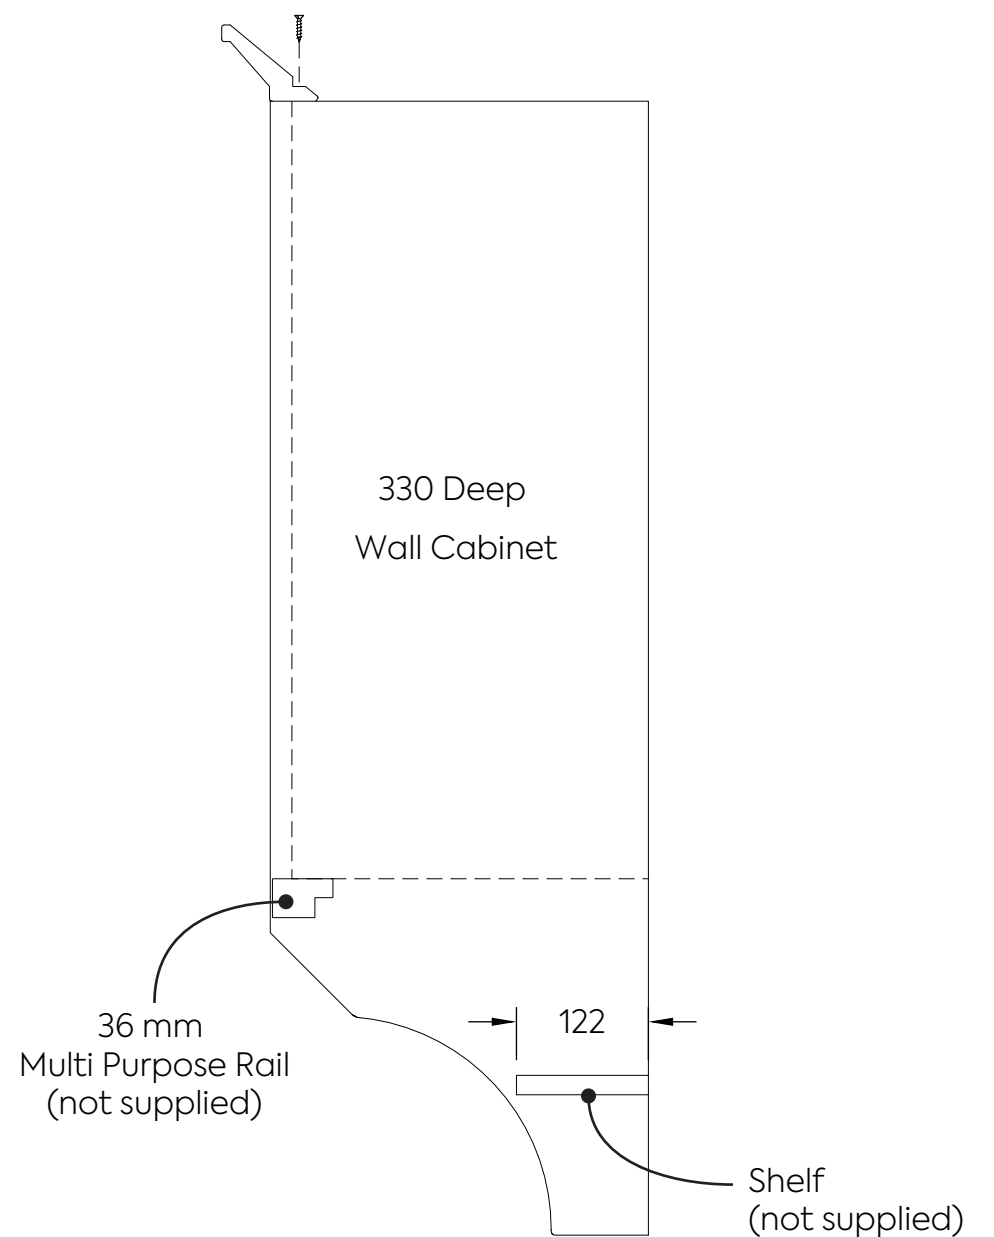

Scroll End Panels

Scroll End Panels can be used to give a “Standalone” look to conventional wall units. They are sized to suit BA Clicbox 330mm deep wall units – Scroll ends are 350 deep. They are ordered individually as Left and Right-handed panels, and are manufactured in exactly the same way as Bella doors – matching foil on the outside face, and co-ordinating melamine reverse face*. They are fitted in the same way as a conventional wall end panel, by screw-fixing from inside face of the wall unit.

Note: Panels are oversized to accommodate a 36mm multi-purpose rail as shown below – the bottom shelf is not supplied as standard but can be ordered in 18mm décor material to the sizes shown below.

* Excluding London Concrete

Note: Multi purpose rail and bottom shelf are not supplied – these will need to be ordered separately. The bottom shelf is 122 mm deep x cabinet width in a suitable 18mm material .
